

Medicare Coverage Database Website Updates

November 21, 2013

On November 21, 2013, CMS launched an update to the Medicare Coverage Database.

1. Fixed a bug where LCDs with a large number of ICD-9 codes were not displaying codes properly.
2. Fixed a bug where Proposed/Draft LCDs with an NRTF status were incorrectly displaying when the RTF filter was selected.
3. Fixed a bug on the Proposed/Draft LCD Details page where the “Released to Final LCD Date” would incorrectly display “N/A.”

On September 27, 2013, CMS launched an update to the Medicare Coverage Database.

1. Added MCD Notice Board functionality to the MCD Overview page. This feature will appear on the MCD Overview page only when there is important information to convey to MCD users.
2. Updated the Related Documents section for LCD and Article details pages so that document links will continue to display when the related documents move to the MCD Archive Site.
3. Updated the MCD Archive Site link (which displays when there are archived versions of the document) in the Public Versions section of LCD and Article details pages so that the link utilizes the correct contractor information.
4. Updated the Jurisdiction field label on LCD and Article details pages to display as bolded text rather than a hyperlink.
5. Fixed a bug where the first page was not printing correctly in Internet Explorer 8.
